

TEACHING SYSTEM AND METHOD FOR STRINGED MUSICAL INSTRUMENTS

Abstract of the Disclosure

A method for teaching stringed instrument students how to play sheet music through the use of colored fingering numbers. This method assists the user in knowing which finger to use on which string as they play instrumental music. It also indicates which position their hand should be in as they play sheet music. Numbers correspond to which finger should be used to play a particular note. Separate, distinctly identifiable colors are assigned to notes that should be played on a particular string in a particular position, and are visually displayed as colored fingering numbers that indicate which string and in which position the user should play the fingered notes on.
